GENERAL AND REVENUE SECRETARIAT.

Serial Nos. 1-2

Major ~~Part B.~~ for June 76.

SUBJECT.

Sale of the right to collect Bagne today
among the village owners alone during 1876-7.

From the Commune Ashagram Dn.
No 126 £130. 5. 76.

R18 Section 4, certain proposals
relative to a cess on the Revenue from
Sale of the Bagne today, pents.

So, the Commune Ashagram Dn.

No 3037 £123. 6. 76.

R31 passes over as in the above.

The first thing I should mention is that the Commission is to be held in the
 March 1874, it was decided that with the
 amount of the survey, the Commission is to be held in
 to the village the night of drawing, the
 body from then on the street, having in
 garden and fields at an average of 100
 5 years the Commission was held upon, but it
 was observed that the diet not disposed of the
 front loaded under such load I of food &
 of the Royal Commission order of 2nd

SECTION 5. 12
SERIAL NO. 3-7671-2
GENERAL NO. 1

John B. Coe
No. 126
May 19 1874
C. D. May & Co.

9-27 (91)

ascertainment on all Bagai trees growing in coffee
gardens both European and Native, and in all
huttals, the holders of such gardens or huttals are
being at liberty to use the toddy of the trees
for his own and his servants' consumption, but
not to sell except Alor the licensed vendor
toddy drawn from his own trees.

2
Omb
1864

It will be seen from previous corres-
pondence that the old system of renting out by
village or Toduk, the right of drawing Bagai
toddy from trees on Government lands, and in
European gardens and huttals for a fixed sum for
an indefinite period or until the receipt of a
right to be continued in 1865-67, when the
system of public competition was introduced. But
as this was disliked by the villagers on account
of the encouragement given by it to outsiders
to the detriment of their interests, and by the
European officers on account of the
expense incurred by the Government, both parties
were in favor of the old system of renting out
the toddy by village or Toduk for a fixed
sum until the average of five years was
reached.

32

until the completion of the Survey operations. The orders of the Chief Commissioner alluded to above, directed that this should be done with respect to the trees grown on Government land, but it has been hitherto found impossible to give effect to these instructions as the Pales generally included all the trees growing within the boundaries of the village, without distinguishing those standing on Government land, and consequently the accounts did not show the amount of revenue for each locality separately. An attempt has lately been made to ascertain by counting the trees, the relative amounts payable by Europeans and native proprietors and for Government unoccupied land, and to estimate the amount to be fixed on each productive tree so as to obtain an amount of revenue equivalent to that now received by Government with the following results.

A. European Coffee Estates.

Talooks.	Total number of Trees.	Deduction.			Talook in wct.
		Young Trees.	Old trees unfit for use.	Total	
Maujarabad	2943	934	1438	2342	601.
Bilari	158	106	3	109	49.
Total	3101	1040	1441	2481	650

as they may choose to retain for the use of their
 Police without the opinion of disposing of them
 in any way to the detriment of the Contrabands
 interests, and the Museum has therefore been raised
 exclusively from the Public Profits and from
 the two or unexpended Government funds.

[illegible]

By distributing the total amount obtained by the sale of trees in gardens, hitherto Government unexpended land in proportion to the estimated number of trees in each locality, the amount chargeable to the various gardens was hitherto would be

Manjarabad. Rs. 5.85.10.10

Bilwa 3029.4.8.
8614.15.6.

and in Government lands.

Manjarabad 483.6.2.

Bilwa 121.7.10.

904.14.2.

Total 9519.13.6.

Giving an average annual value for each produce.
in the of Rs. 4.5 for Manjarabad, and Rs.
1.2 for Bilwa.

The Bilwa result corresponds
very nearly with that arrived at by taking
the annual collections of last year for each Hobli
and dividing the amount by the number of produce.
The two given in the returns, the average value
of the two years, the two years being, Rs. 1.2.10
and Rs. 1.0.2 respectively, but in Manjarabad
the collections of last year would give Rs. 7.10
as the annual value of it might be and the
best result of averaging the valuation in the
average of two years would be a loss of
Rs. 2524.12.0 compared with the valuation
of last year.

The service of this amount would

3 (a)

be of comparatively little importance, if the settlement was a fairly equitable one, for after inquiries in Nanjarabad both among Europeans and Natives I found that the system of annual auction sales is unpopular, and in many ways objectionable, and that both classes of proprietors would prefer a fixed payment to be made by themselves annually, but on examining the detailed accounts of the villages rented in 1875-76, I see no possibility of adjusting the proposed rates with any approach to fairness in individual cases.

There were 400 village sales under which the trees within the limits of each village were disposed of to the highest bidder, whether a resident of the village or not, and if the total amount which would be realized by the proposed rates from trees represented by the returns to be standing in each Native garden or huttah in the village be compared with the rates at which the villages sold, the discrepancies are so great as to be quite irreconcilable.

Statement No. 1 enclosed shows this in detail, and it will be noticed that while
